PROFILE

Looking for a technical proficient organization where I can learn and expand my knowledge and work professionals and improve my skills.

PROJECTS

SPEED ADAPTATION USING VISUAL INTELLIGENCE

2022

This project is a traffic signs detection and classification systems on videos using OpenCV. The detection phase uses Image Processing techniques that creates contours on each video frame and find all ellipses or circles among those contours

Real time air pollution and water quality monitoring for industries using internet of things(IOT)

2021

This project automatically measures air pollution and water pollution parameters using sensors. The output from these sensors is fed to the Arduino microcontroller. The microcontroller reads the data and then displays it on a LCD

TECHNICAL SKILLS
